

# MySQL - Bag Of Tricks

## Introduction

This document has many useful command.

## MySql Kill users

You can use the following syntax to lookup users within a database

```
SHOW PROCESSLIST;  
SELECT group_concat(concat('KILL ',id,';') SEPARATOR ' \n') FROM information_schema.processlist WHERE `db`  
LIKE 'ashe%' AND `user` ='kiwilive';
```

Then cut and paste into a query window
