

Kiwiplan - Install Web Launcher

This requires Java to be installed first

- First program that must be installed in Kiwiplan_Web_Launcher_Setup.
 - This file is usually in the Linux server in the MES folder for the current revision or on the RDS server if it was copied
- Verify Kiwiplan Launcher version works with current revision, if not need to uninstall and reinstall different Kiwiplan Launcher. (Should verify with Kiwiplan)
- Open local drive > Kiwiplan > Kiwiplan Revisions.
- Choose the appropriate revision folder (May need to confer with Kiwiplan to know which

- Run “Kiwiplan_Web_Launcher_Setup” as Admin
 - Click “Yes” for Do you want to allow this app from an unknown publisher to make changes to your device.
 - This is a silent launcher and takes a few second to install.
 - Verify by going into Kiwiplan folder and seeing c:\kiwiplan
-

Revision #2
