

Security - Export Kerberos KeyTab from Windows Root CA

KeyTab Export

To export the KeyTab from the Windows CA server, in this case it is for KeyCloak mentioned [HERE](#)

Run this in PowerShell

```
cd \temp
ktpass -princ HTTP/server.domain.com@SERVER.DOMAIN.COM -mapuser user@DOMAIN.COM -pass " -crypto
AES256-SHA1 -ptype KRB5_NT_PRINCIPAL -out keycloak.keytab
dir
```

This will show you the newly create KeyTab

```
PS C:\temp> dir

Directory: C:\temp

Mode                LastWriteTime         Length Name
----                -
-a-----         2/10/2026   9:37 PM           97 keycloak.keytab

PS C:\temp> |
```
